UNINETTUNO arrives in Vietnam

UNINETTUNO's presence in South-East Asia gets stronger: an important agreement was undersigned between the online University and the Huè College of Economics in Vietnam.

Today, the collaboration started with the Asian University thanks to the LMPT Project (Professional Bachelor and Master Programs for the Design and Development of Sustainable Tourist Activities) is reinforced thanks to this new partnership envisaging: the development of joint academic curricula; the mobility between the two Universities; the training of teachers and of the academic staff on how to approach e-learning and the distance learning methodology.

Among their plans there is, as well, the opening of a UNINETTUNO Technological Pole in Huè aimed at supplying the students with educational services and technological support.
